

High-Tech Gründerfonds is Germany's biggest and most active seed stage investor. We stand at your side as a strong business partner, providing your high-tech start-up with seed capital. But that's not all. HTGF actively helps you to grow your business through our strong business network and corporate expertise right up until the exit stage.

More than just financing

- We provide the appropriate financing for you and your company – including alongside partners – and offer a suitable support package.
- We invest up to EUR 1 million in seed funding.
- We provide financing as a lead investor either on our own or together with additional partners that your company has brought to the table or who we have contacted ourselves.
- We offer investment in the traditional equity model or in the form of a convertible loan through the issue of shares – depending on your requirements.
- We reserve up to EUR 3 million in equity capital for your company.
- In addition to our substantial network of national and international investors, industry partners, experts and our extensive portfolio of businesses, you also benefit from an experienced team of investment managers.
- This makes us the ideal partner for you – not just in terms of financing but also on matters of corporate strategy.
- HTGF is the seed investor for your company. This means that your high-tech start-up must have been founded less than three years ago (entry in the German Commercial Register) and that you have previously obtained no more than EUR 500,000 in equity capital, silent partnerships or convertible loans from other investors.
- It is a good match, if your company or an independent branch of it is domiciled in Germany.
- We like to invest abroad together with regional investors.
- We welcome contributions of your own capital, but this is not mandatory.
- If you need any support, our [HTGF scouts](#) will be there for you.

Flexible financing opportunities.

Max. EUR 1 million in seed funding.

Additional EUR 2 million in follow-up financing
